The TR-3160 is designed for either a single or double overdrive transmission. Ideal for light delivery vans, light commercial vehicles and performance vehicle applications, this transmission incorporates the latest design and manufacturing technologies to provide the highest torque capacity and best-in-class shift feel.

Based on an 81mm center distance, the TR-3160 utilizes high strength steel on all gears and shafts - maximizing torque capacity and durability while minimizing weight and package size.

The multi-rail shift system accommodates direct mount and semi-remote shifter locations that provide greater flexibility while reducing noise, vibration and harshness (NVH).

Product Highlights
High capacity tapered bearings and high-capacity synchronizers that contribute to low shift efforts and shifter travel. All gears are hard-finished, which contributes to the transmission’s refined feel and low noise.

TR-3160 Features at a Glance:
- Rear wheel drive, six-speed manual transmission available with single or double overdrive
- Double and triple cone synchronizers featuring hybrid and sintered bronze friction material.
- Multi-rail shift system accommodates direct mount or semi-remote shifter locations
- High-precision guide plate
- Advanced interlock system
- Anti-friction roller ball detents
- Hollow shafts and webbed gears
- Three-piece “end load design” aluminum housings
- Low-friction linear shift rail bearings
